Placing an order

David Lackner - 2022-06-23 - Order

Ordering from us is very easy: After the desired items have been placed in your shopping cart, you can place your order by clicking on the "Checkout" button.

For this purpose, we recommend that you set up a customer account. If you are a new customer, you can easily set up an account during the ordering process. If you already have a customer account, you can simply log in with your user data (e-mail address and password).

You will then be guided through the order process in four steps (address - delivery method - payment method - confirmation) and can complete the order. We also offer orders without registering a customer account. To do this, click on "Continue without registration" in the registration form and follow the order process.
