Our top tips for using your new Classic H6

1. **Before you start** using the product, you should always read the **Quick Start Guide** for Classic H6.

You can find the QSG for Classic H6 here in our **download area.**

To get a first impression of how to use your new Pure Stereo Digital Radio, also take a look at **this video**.

1. **Before we begin**, let's point out the obvious.

Please ensure that your device is connected to a power source, the antenna is fully extended, and all plastic covers have been removed.

1. **Switching the Classic H6 on/off**

When you press the standby on/off button, your Classic H6 will start up with the last source you listened to.

When the Classic H6 is used for the first time, the device will automatically start a DAB search. All available stations will be found and saved in the 'Station List' without you having to do anything.

1. **Scanning and selecting DAB+ or FM stations**

We have two separate articles on these topics, which you can select by clicking on the highlighted words.

1. **Saving or recalling a preset**

The Classic H6 offers two methods for saving presets. These can either be stored on one of the 5 (6 on the remote) quick memory buttons or added to the preset list.

Pressing one of the quick save buttons until 'Preset stored' appears saves the station you are currently listening to. You can recall it by briefly pressing the save button. For more details, **click here.**

1. **Changing the source**

This is very simple. Pressing the ‘Source’ button opens the source window. If you want to learn more about the source options, **read this article.**

1. **Pairing a Bluetooth device**

Press the BT button and your Classic H6 will enter pairing mode.

For more detailed instructions on how to find your Classic H6 on the device you want to pair with, as well as more information on pairing with BT, **click here.**

1. **Setting an alarm**

The Classic H6 has 2 different alarms that you can set. We have created a detailed **step-by-step help article** to explain the details.

1. **Adjusting the display brightness in standby and operating mode**

Classic H6 offers you various options for adjusting the brightness of your display.

Each of these functions is described in the corresponding help **article linked here.**
