How to adjust the light on a Woodland Glow?

Customer Support - 2025-07-04 - Woodland Glow

You would like to create a special light atmosphere?

1. To use the light option, turn the Woodland Glow on. This is confirmed by a sound.
2. You can now activate the light by turning the “**Dimmer**” knob.
3. The Woodland Glow will start to increase the brightness with a cold white light, followed by increasing the brightness of a warm white light.

Choose your personal light temperature to create a special atmosphere accompanied by great sound.
