How to store and retrieve station presets on a Classic H6?

Customer Support - 2025-09-24 - Classic H6

Want to store or retrieve a preset on your Classic H6?

The Classic H6 allows you to store up to **40 station presets**, for both **DAB** and **FM**.

1. You can save the radio station you are currently listening to either on one of the **five quick memory buttons** (**6 on the remote control**) or add it to the memory list.
2. If you press one of the quick memory buttons until '**Preset "x" saved**' appears, the station you are currently listening to will be saved.
3. You can quickly recall it by briefly pressing the memory button.

1. To save a station in the preset list, press and hold the preset list button until the '**Save preset'** list opens.
2. Turn the "**Select**" knob to select the position within the list (**1-40**) and press the '**Select**' knob to confirm.
3. If you select presets 1-6, the previously saved '**Favourites**' will be overwritten.
