No sound is broadcast on TalkRADIO and TalkSPORT2

Laura - 2021-10-19 - DAB+ Radio

It has come to our attention since Sept 2016 that the Evoke 2s and One Classic/Elite may not produce any audio when tuned into Times Radio, TalkRADIO and TalkSPORT 2. The stations use a lower bitrate than traditional DAB stations.

A work around to listen to these stations is to use the Revu function on the radio to rewind the live feed, the radio will then decode the stations content.

Unfortunately, given the age of these products, it is now not possible to make software updates. We apologise to those who are affected by this issue.
