Setting up Jongo using an iOS device

Laura - 2021-10-19 - Apple/Android Pure Connect

You can connect Jongo to your Wi-Fi network by following the below steps

- Make sure Jongo is in range of your Wi-Fi network.
- Briefly press Jongo's Wi-Fi button. Jongo's power LED will start flashing green.
- From your iOS device, open Settings>Wi-Fi and connect to Jongo’s wireless network when it appears in the list.
- Open your browser at 192.168.1.1 to start Jongo Setup Manager.
- Carefully enter your Wi-Fi network details and Save.

Note: If for example your SSID is hidden or you require a static IP address for your Jongo please select Advanced where you can specify this
