## Configurazione di media player sul Mac (solo sul Mac)

Laura - 2021-10-19 - Media Streaming und Flow server

Vi suggeriamo di usare Serviio per condividere la musica sulla tua internet radio sebbene altri software server utilizzano la versione1 uPnP per funzionare.

Il Mac con l'audio o con il media che tu vorresti condivedere dovrebbe essere collegato alla stessa rete della tua radio.

Per prima cosa dovresti andare su <u>http://serviio.org/</u>, poi cliccare su Download sulla barra del menu e cliccare sul link con I prodotti della versione Serviio situate dopo l'icona del logo di Apple.

Quando il file che stai scaricando sara' nella tua lista dei Download (vedi l'immagine sotto)

Fai il doppio click sul Serviio download. Vedrete una finiestra pop up (l'immagine sotto)

							,💙
