Managing presets via an embedded configuration web-page

Customer Support - 2025-02-04 - Evoke Spot / Play / Home

Managing presets via an embedded configuration web-page.

To access the web-page:

1. Switch the speaker to the mode you want to manage presets for.
2. On the speaker select Menu - System settings - Network - View settings
3. Scroll to the bottom of the page and make a note of the IP address (for example 10.40.225.42)
4. Type the IP address into a web browser on a PC connected to the same network to load the page
5. Select the Presets tab to manage the presets (see screenshot below).
6. You can also add custom presets if you know the URL
