Can I adjust the treble and bass on my Jongo Family?

Note: This can only be done using an Android device. This feature has been taken away from the new version of the Pure Connect app for Apple devices (IOS 11+)

This is only a feature on the T series. To adjust the treble and bass start playing the content you want to stream.

Then tap the  to stream to the Jongo.

If you tap on the settings cog (highlighted) this will take you to the treble and bass menu.

Note: On the Jongo S3 you can adjust the balance by following the same instructions. (Only if you have a stereo pair set up)
