How can I pair a Bluetooth device with the Evoke Home?

Customer Support - 2025-01-27 - Evoke Home

Would you like to pair your phone or another Bluetooth device to your Evoke Home?

When you enter Bluetooth mode for the first time by selecting Bluetooth Audio as a source, or short pressing the “**Bluetooth**” button, the Evoke Home will automatically enter pairing mode.

All you need to do is go to the Bluetooth settings on your device, find **Evoke Home** in the list, and select it to pair.

The next time you enter Bluetooth mode, Evoke Home will automatically try to reconnect to the last connected device.

You’re now connected via Bluetooth and ready to enjoy your music wirelessly with Evoke Home.

If no device is currently paired, Evoke Home will automatically enter pairing mode.

You can also enter Bluetooth pairing mode by long pressing the “**Bluetooth**” button.
