How to scan and select DAB stations on a Classic Stereo?

Customer Support - 2025-09-29 - Classic Stereo

You would like to search for DAB+ radio stations and select them on your Classic Stereo?

When you select DAB+ as a source for the first time, the Classic Stereo will enter a DAB scan automatically. All available stations are found and saved in the "**Station list**".

To change the DAB station,

1. press the "**Home**" button to open the DAB menu.
2. Press the "**Volume/Select**" dial to open the “**Station list**”.
3. You can now scroll through the available stations by turning the dial.
4. Once you've found the station of your choice, press the "**Volume/Select**" dial to switch to that station.

For a **new scan** simply press the "**Home**" button while being in DAB mode and select the option “**Scan**”.

Your radio will then delete all stored DAB stations and automatically begin scanning for all available stations.

Use the "**Prune invalid**" function to delete stations no longer available.
