How do I pair a Bluetooth device?

Customer Support - 2026-10-30 - Evoke One

Would you like to pair your smartphone or another Bluetooth device with your Evoke One?

1. When you switch to Bluetooth mode for the first time by selecting Bluetooth as the source, the Evoke One automatically enters pairing mode.

2. Simply go to your device's Bluetooth settings, find the Evoke One in the list and select it to pair.

The next time you enter Bluetooth mode, your Evoke One will automatically attempt to reconnect to the last connected device.

You are now connected via Bluetooth and can enjoy your music wirelessly with the Evoke One.

To pair a new device or to re-pair or unpair a device, press and hold the 'Bluetooth' button until 'Pair Evoke One' is displayed.

If no device is currently paired, the Evoke One will automatically enter pairing mode.

*Bluetooth headphones/speakers cannot be paired.
