How long do the batteries of the wireless controller last?

Laura - 2021-10-19 - Highway 400/600

The wireless display is powered by 2x AAA batteries which are provided in the box. Based on our commuter user case and the default 15s display time out the battery life would be around 8months.
Daylight = 9months
Night time (with button LED’s on) = 6months
Note: Battery life will reduce if the display time out is increased.
