How to listen to Internet radio and select stations?

Customer Support - 2026-05-05 - Classic H4i

You want to listen to Internet radio and select different stations?

1. To switch to Internet radio mode, simply tap the '**Source**' button on your Classic H4i/Classic C-D6i to open the selection window.
2. Repeatedly press the '**Source**' button or turn the '**Select**' wheel to cycle through the available sources.
3. To confirm your selection, press the '**Select**' knob.
4. You can use the '**Browse**' option to filter Internet radio stations according to the following criteria.

- '**Local radio**'
- '**Globe most popular**'
- '**Globe all**'
- '**Globe by genre**'
- '**Globe by region**'

Use these filters to find stations by popularity, genre or region.

1. Turn the '**Select**' knob to scroll through the categories and press it to confirm.
2. To return to the previous menu, press the '**Back**' home button.

Another option to find specific channels is the '**Search**' function

1. To start a search, highlight '**Search**' and press the selection wheel.
2. Select a search method to search for a specific channel.

- '**Contains**' - Finds stations with the text you entered somewhere in the name.

- '**Begins with**' - Shows stations that start with your input.
- '**Ends with**' - Shows stations that end with your input.
- '**Search history**' - Access previously searched stations.

When you find a match, highlight the desired station and press the '**Select**' button to select it. The radio will start streaming.

To return to the search results, turn the selection dial. If no hits are found, press the '**Home** '(Back) button to return to the search screen.

You can use the search history to quickly access previously searched channels.

Select '**Search history**' to view previous searches. Mark a previous search with the selection wheel and press it to repeat the search.

History

To find recently played stations, mark '**History**' with the '**Select**' dial and press to confirm and display your listening history.

You can now browse through the list and select a previously listened to station.
