How to scan and select DAB stations [Moment, Moment Charge]?

INSIDE / AQIPA - 2025-07-04 - Moment

You would like to search for DAB+ radio stations and select them?

When you use Moment for the first time, the DAB scan happens automatically. All available stations are found and saved in the "Station List".

For a new scan press the "Home" button while being in DAB mode, go to "Settings", and select the option “DAB Scan”. Your radio will then delete all stored DAB stations and automatically begin scanning for all available stations.

1. To change the DAB station, press the "Home" button on the radio while being in DAB mode.
2. Select “Station List” and press the "Select" dial to open it.
3. You can now scroll through the available stations by turning the dial. Once you've found the station you want, press the "Select" dial to switch to that station.

If this is still not clear, check out the step-by-step video below:
