# How can you change your Bloom’s EQ settings?

Customer Support - 2026-08-28 - Bloom

## Would you like to adjust the EQ audio settings on your Bloom?

1. To access the Bloom’s EQ settings, press the ‘**Menu**’ button.
2. Turn the **dial** to select ‘**Settings**’ and press the button to confirm.
3. Now use the **rotary knob** to select ‘**Equaliser**’ and confirm again by pressing the knob.
4. You can now choose between ‘**Dynamic**’, ‘**Comfort**’, ‘**Neutral**’ and the ‘**Custom**’ option to personalise your sound.
5. When you select ‘**Set up Custom**’, you can manually adjust the bass, midrange and treble.

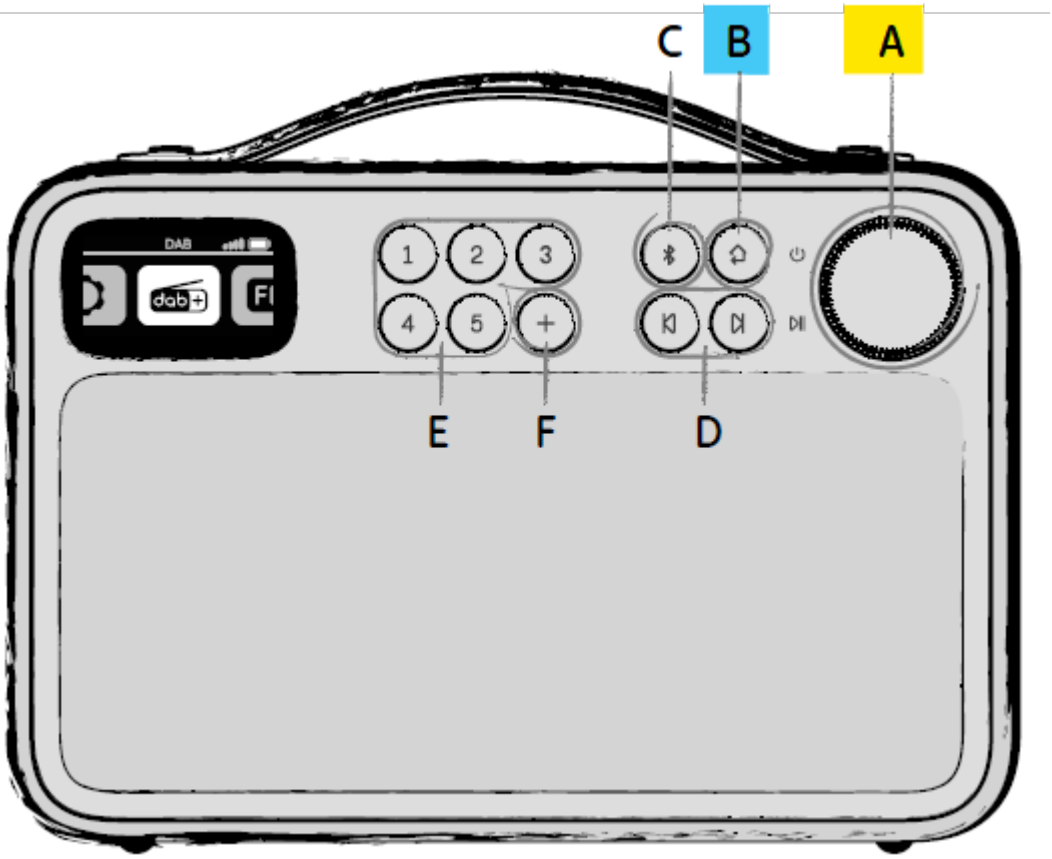

The different modes:

**Dynamic** – Deep bass response – dynamic vocals and instruments

**Comfort** – Comfortable listening all day long

**Neutral** – Sound that is as close as possible to the original source material

**Custom** – User-defined EQ setting – Define your own sound using the bass, midrange and treble controls
