How do I pair a Bluetooth device with my Bloom?

Customer Support - 2026-08-28 - Bloom

Would you like to pair your phone or another Bluetooth device with your Bloom?

The first time you switch to Bluetooth mode – either by selecting Bluetooth as the source or by pressing the **Bluetooth** button – pairing mode is automatically activated.

All you need to do is go to your device's Bluetooth settings, find Bloom in the list and select it to pair.

The next time you switch to Bluetooth mode, your Bloom will automatically attempt to reconnect to the last connected device.

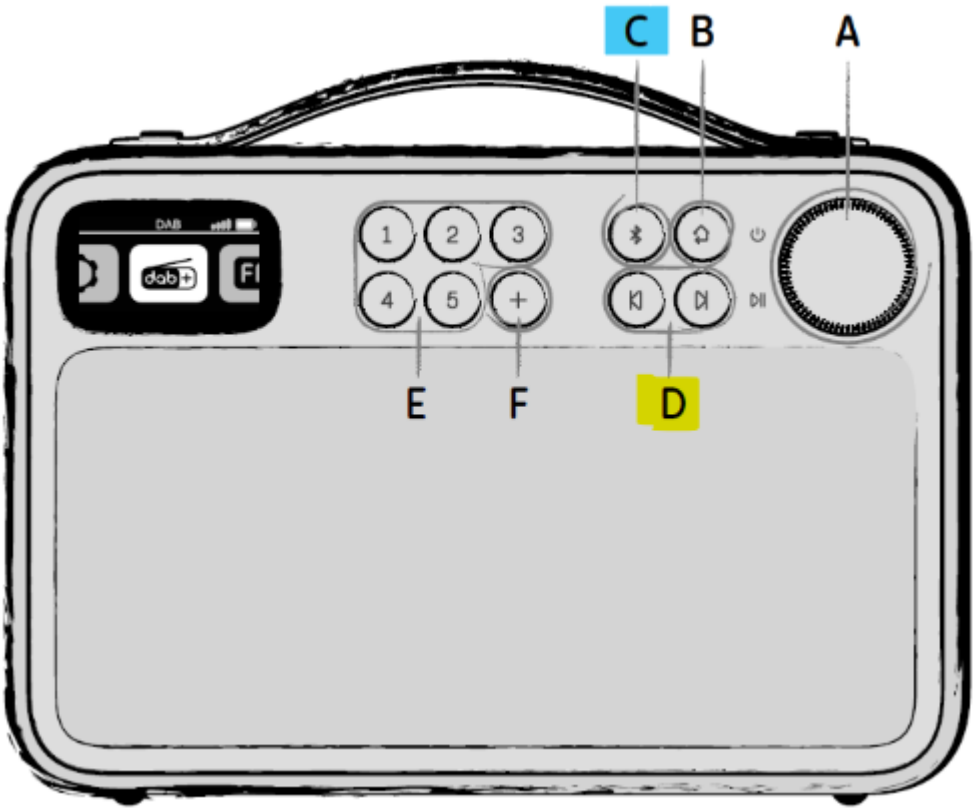

You are now connected via Bluetooth and can enjoy your music wirelessly with Bloom.

Use the **skip** buttons to scroll through the tracks.

To pair a new device or to re-pair or unpair a device, press and hold the '**Bluetooth**' button for 2 seconds.

If no device is currently paired, the Bloom will automatically enter pairing mode.

*Bluetooth headphones/speakers cannot be paired.
