How to scan for and select DAB stations on a Bloom?

Customer Support - 2026-08-28 - Bloom

Would you like to search for DAB+ radio stations and select them on your Bloom?

When you use your Bloom for the first time, the DAB scan takes place automatically.

All available stations are found and saved in the station list.

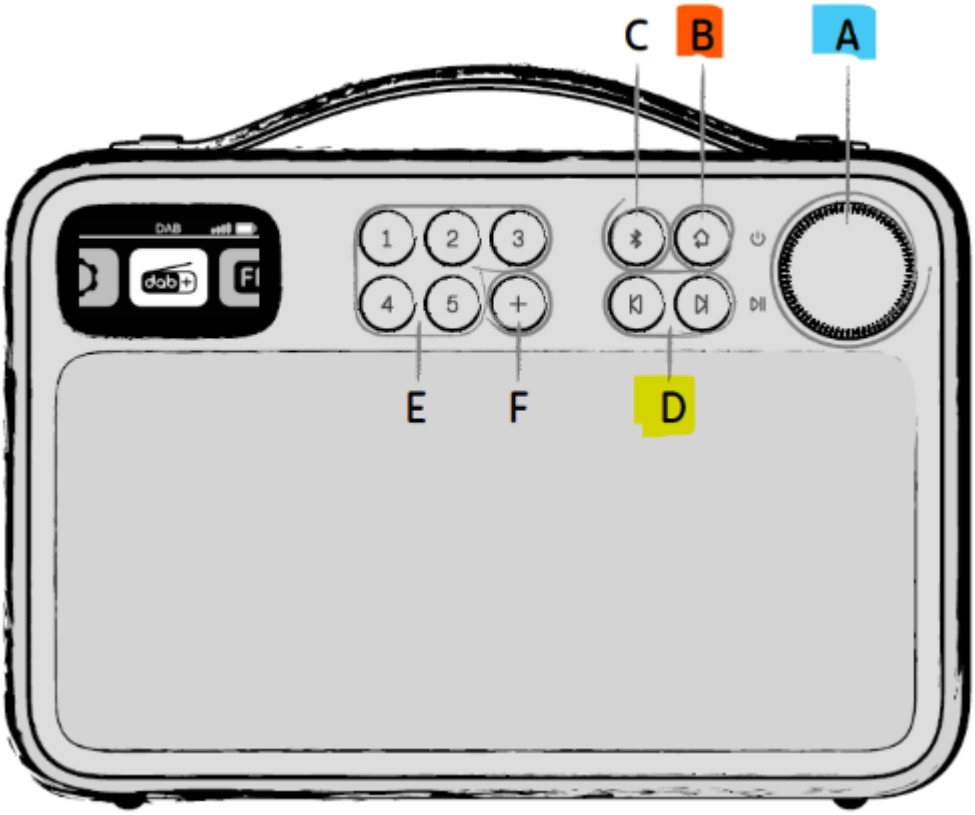

To change the DAB station,

1. press one of the '**Skip**' buttons to bring up the station list.
2. You can now scroll through the available stations by turning the **volume control**.
3. Once you've found the station you want, press the control to switch to that station.

To perform a new scan,

1. simply press the **Menu** button in DAB mode and select the '**Settings**' option.
2. Confirm by pressing the control dial.
3. Now select '**DAB Scan**' and confirm your selection again.

Your radio will now delete all saved DAB stations and automatically begin scanning for all available stations.
