Highway Notification: Changes to Spotify mode

Customer Support - 2023-11-29 - Highway 400/600

Changes to Spotify Mode and how it will affect me.

What are the changes and when will it happen?
Spotify has discontinued the software Application Program Interface (API) that is used within the Pure Go App. This allowed users to select and playback Spotify content via the Highway Commander when in Spotify mode.

How will this affect me?

The change will affect how you access Spotify content when using Highway.

Spotify mode on Highway will no longer work.

As an alternative you can open the Spotify App on your phone and playback audio directly to Highway in Bluetooth mode, without using the Pure Go App. You will be able to play/pause the current track and skip to the next and previous Spotify track via the dedicated keys on the Highway commander.

NOTE: *DO NOT attempt to select audio content in the Spotify App on your phone while driving, any/all set up should be done while stationary before your drive.*
