How do I pair a Bluetooth device?

Customer Support - 2026-10-30 - Evoke Home II

Would you like to pair your smartphone or another Bluetooth device with your Evoke Home II?

1. When you switch to Bluetooth mode for the first time by selecting Bluetooth as the source, the Evoke Home II automatically enters pairing mode.

2. Simply go to your device's Bluetooth settings, find the Evoke Home II in the list and select it to pair.

The next time you enter Bluetooth mode, your Evoke Home II will automatically attempt to reconnect to the last connected device.

You are now connected via Bluetooth and can enjoy your music wirelessly with the Evoke Home II.

To pair a new device or to re-pair or unpair a device, press and hold the 'Bluetooth' button until 'Pair Evoke Home II' is displayed.

If no device is currently paired, the Evoke Home II will automatically enter pairing mode.

*Bluetooth headphones/speakers cannot be paired.
