How do I pair a Bluetooth device?

Customer Support - 2026-11-05 - Elan Sleep

Would you like to pair your smartphone or another Bluetooth device with your Elan Sleep?

When you switch to Bluetooth mode for the first time by selecting Bluetooth as a source, your Elan Sleep will automatically enter pairing mode.

All you need to do is go to the Bluetooth settings on your device, find your **Elan Sleep** in the list, and select it to pair.

The next time you enter Bluetooth mode, your Elan Sleep will automatically try to reconnect to the last connected device.

You’re now connected via Bluetooth and ready to enjoy your music wirelessly with your Elan Sleep.

Use the direction buttons (**< or >**) to skip through tracks.

To pair a new device or if you need to re-pair/unpair a device, keep the "**Home/Back**" button pressed until "**Pairing**" is displayed.

If no device is currently paired, your Elan Sleep will automatically enter pairing mode.
