How to scan and select DAB stations on a Classic H4?

Customer Support - 2025-07-24 - Classic H4

You would like to search for DAB+ radio stations and select them?

When you use Classic H4 for the first time, the DAB scan happens automatically. All available stations are found and saved in the "**Station List**".

To change the DAB station,

1. Turn the "**Select**" dial by one click while being in DAB mode. The “**Station List**” will appear.
2. You can now scroll through the available stations by turning the dial.
3. Once you've found the station you want, press the "**Select**" dial to switch to that station.

For a new scan simply press the "**Home**" button while being in DAB mode and select the option “Full Scan”. Your radio will then delete all stored DAB stations and automatically begin scanning for all available stations.
