How to pair a Bluetooth device with an Elan Move?

Customer Support - 2026-03-27 - Elan Move

Would you like to pair your phone or another Bluetooth device with your Elan Move?

When you switch to Bluetooth mode for the first time by selecting Bluetooth as a source, the Elan Move will automatically enter pairing mode.

All you need to do is go to the Bluetooth settings on your device, find Elan Move in the list, and select it to pair.

The next time you enter Bluetooth mode, Elan Move will automatically try to reconnect to the last connected device.

You’re now connected via Bluetooth and ready to enjoy your music wirelessly with Elan Move.

To pair a new device or if you need to re-pair/unpair a device, long press the "**Source**" button on the Elan Move while being in Bluetooth mode until "**Pairing**" is displayed.

If no device is currently paired, the Elan Move will automatically enter pairing mode.
