How to pair a Bluetooth device with the Woodland Glow?

Customer Support - 2025-07-04 - Woodland Glow

Would you like to pair your phone or another Bluetooth device with a Woodland Glow?

When you switch to Bluetooth mode for the **first time** by selecting Bluetooth as a source, it will automatically enter pairing mode.

All you need to do is go to the Bluetooth settings on your device, find **Woodland Glow** in the list, and select it to pair.

The next time you enter Bluetooth mode, Woodland Glow will automatically try to reconnect to the last connected device.

You’re now connected via Bluetooth and ready to enjoy your music wirelessly with Woodland Glow. Use the "**Skip Track Forward / Previous Track**" buttons to skip through tracks.

To pair a new device or if you need to re-pair/unpair a device, keep the "**Bluetooth**" button pressed for 2 seconds. After releasing the Bluetooth button, this will be confirmed with a tone and the Bluetooth LED will start flashing.

If no device is currently paired, Woodland Glow will automatically enter pairing mode.
