How to scan and select DAB stations on a Classic H6?

Customer Support - 2025-10-10 - [Classic H6](#)

Want to search for and select DAB+ radio stations?

When you use your Classic H6 for the first time, it will automatically scan for DAB stations.

All available stations will be found and saved in the '**Station List**'.

To change the DAB station,

1. Turn the '**Select**' knob with one click while in DAB mode. The '**Station List**' will be displayed.
2. You can now scroll through the available stations by turning the knob.
3. When you have found the station you want, press the '**Select**' knob again to switch to that station.

To perform a **new scan**, simply press the "**Home**" button in DAB mode and select the '**Full Scan**' option.

Your radio will then delete all stored DAB stations and automatically start scanning for all available stations.
