I have a Siesta Flow, Evoke Flow, Avanti Flow, Oasis Flow, One Flow, Sensia/200D Connect, Evoke F4 or Contour and have discovered a new internet radio station that I would like to listen to.

Sarah Spencer - 2021-10-19 - General Internet Radio Questions

Unfortunately, it is not possible to add new radio stations because your product belongs to an older generation of technology and the possibility to update the database has been limited by the 3rd party provider implemented in these models. As technology is changing and evolving fast so do the providers of internet radio software.

This is why over time a decrease in compatibility with the newest stations and limitations to update those to older databases, unfortunately, becomes more likely.

Your old pre-sets and radio stations already in the database are however not affected and still can be used as usual.

You still want to listen to the latest internet radio stations.

Of course, it is possible to plug in a mobile device via aux-in as a workaround to stream your desired station.

Furthermore, we would be happy to offer you a discount on a newer generation internet radio if you decided to upgrade.

For this, please contact customer service [here](#).
