Managing presets via an embedded configuration web-page

Customer Support - 2025-02-04 - [Evoke Spot / Play / Home](#)

Managing presets via an embedded configuration web-page.

To access the web-page:

1. Switch the speaker to the mode you want to manage presets for.
2. On the speaker select Menu - System settings - Network - View settings
3. Scroll to the bottom of the page and make a note of the IP address (for example 10.40.225.42)
4. Type the IP address into a web browser on a PC connected to the same network to load the page
5. Select the Presets tab to manage the presets (see screenshot below).
6. You can also add custom presets if you know the URL

The screenshot shows a web interface for Frontier Smart Technologies. At the top, there is a navigation bar with the logo and the text 'FRONTIER SMART TECHNOLOGIES'. On the right, there is a language dropdown menu set to 'English'. Below the navigation bar, there are several tabs: 'Status', 'Network', 'Update', 'Presets', and 'Report'. The 'Presets' tab is selected. The main content area is titled 'Internet radio mode' and shows a table of presets. The table has three columns: 'Preset', 'Name', and 'Action'. There are 10 rows in the table. The first two rows have names: 'Capital London' and 'BBC Radio 2'. The remaining rows are empty. The 'Action' column contains 'Play' and 'Edit' buttons for the first two rows, and only 'Edit' buttons for the others. At the bottom right, there is a pagination control with 'Previous', '1', '2', '3', '4', and 'Next' buttons.

Preset	Name	Action
1	Capital London	Play Edit
2	BBC Radio 2	Play Edit
3		Edit
4		Edit
5		Edit
6		Edit
7		Edit
8		Edit
