## Use of Lithium AA batteries with Elan One/DAB+/Connect/+ Customer Support - 2022-07-06 - Elan Connect/Connect+

When using lithium AA batteries with the above models, we have found that we cannot recommend this type of battery. The normal open-circuit voltage of these batteries when new exceeds the maximum voltage tolerance of the devices and causes them not to switch on.

To ensure trouble-free use of our devices, we would like to ask you to refrain from using lithium AA batteries.
