

How to control the night light [Moment, Moment Charge]?

INSIDE / AQIPA - 2024-11-05 - Moment

You want to adjust the brightness of your night / wake-up light on Moment or Moment Charge

Controlling the night light on your Moment radio is easy and convenient.

1. To turn the night light on or off, simply press the Light/Snooze button located on the top of the radio. This button lets you quickly toggle the night light whenever you need it.
2. Once the light is on, you can adjust its brightness to your liking. Just press and hold the Light/Snooze button and turn the dial to increase or decrease the brightness level.
3. When you've found the perfect brightness, press the dial to set it.
4. If the light is too bright or too dim, you can easily change it anytime by adjusting it again.

We have created a little video for you that goes through the adjustment step by step. Just click the following link:
